

THE HALF PINT MOBILE DEPALLETZER

“A true mobile depalletizer proven under mobile working conditions”

The Half Pint mobile depalletizer is designed for mobile canners and breweries with tight space restrictions. There is no installation required, making this depalletizer a great option for small breweries and international locations. Works with half pallets of aluminum and metal containers and is specifically designed for low clearance applications such as box trucks or low ceiling heights.

STANDARD FEATURES:

- Stainless steel and lightweight aluminum construction
- Depalletizes multiple sized packages of aluminum and metal containers
- Speeds from 10 CPM up to 60 CPM
- Minimal air consumption (<1 CFM @30 PSI) (<.03cmm @ 2 Bar)
- Fully automated once pallet is inserted into the machine & the straps & tier frame are removed
